CK-25	Approved BrewCore legacy water-interface conversion kit for WF-250 to BC-920	Does not bypass BC-920 production-specific connection requirements.
AK-12	Approved Polarix legacy water-interface adapter kit for WF-300 to IC-420	Machine-side use is limited to the documented IC-420 relationship.

6. Decision Rules

• Identify exact equipment and AquaPure models.

• Retrieve the explicit relationship and any required component.

• Verify production-specific technical bulletins where applicable.

• Separately verify flow, pressure, treatment demand, and site conditions.

• Do not infer compatibility from connector size or physical fit.

• NOT LISTED is not the same as NOT SUPPORTED.
