NORTHSTAR COMMERCIAL SOLUTIONS

Artisan Bakehouse Indonesia Supply & Installation Agreement

Agreement ID: AGR-2026-021

Revision: 1

Effective Date: 1 March 2026

Expiration Date: 28 February 2027

Document Type: Customer Commercial Agreement

Authority Class: Customer-Specific Commercial

Customer: Artisan Bakehouse Indonesia

Customer Tier: Standard

Status: Active

1. Purpose

Establishes customer-specific supply, installation-coordination, and service-response terms for qualifying Artisan Bakehouse Indonesia equipment purchases. This agreement does not establish technical site suitability.

2. Scope

Applies to qualifying Commercial Cooking, Commercial Refrigeration, Warewashing, and related qualifying installation services.

3. Installation Coordination

For qualifying equipment purchased with Northstar authorized installation, scheduling begins only after equipment allocation, required site information, site readiness, utilities, technical compatibility where applicable, and other material prerequisites are confirmed.

4. Scheduling Commitment

Northstar will provide an installation scheduling window within 5 business days after installation readiness is confirmed. This is a scheduling-coordination commitment, not installation completion within 5 business days.

5. Installation Readiness

May require site dimensions, access route, electrical supply, water, drainage, ventilation, clearances, structural support, production identifier, accessories, and other applicable technical conditions. Exact requirements come from technical documentation.

6. OV-660 Example

For CulinaPro OV-660, if exact site dimensions are unavailable and production batch is unknown while a current bulletin defines batch-dependent rear clearance, installation feasibility cannot yet be confirmed. Required next information includes actual installation-space dimensions and the applicable production identifier.

7. Customer Site Responsibilities

Artisan must provide accurate site information required for planning. Incomplete or inaccurate information may delay installation planning. Site preparation such as electrical, plumbing, drainage, structural, ventilation, civil, or access work is not automatically included unless explicitly scoped.

8. Service Response Commitment

For qualifying installed equipment covered by this agreement, Northstar will provide initial service response within 1 business day after a valid service request is logged. Initial response may be triage, clarification, technical review, coordination, or scheduling; it does not mean repair completion within one business day.

9. Equipment vs Installation Availability

Equipment availability and installation availability are separate claims. Stock does not establish site readiness or technician capacity, and installation capacity does not establish equipment availability.

10. Technical Unknowns

An active agreement and included installation service cannot convert missing technical evidence into a confirmed feasibility result. Missing site dimensions or unresolved production-specific requirements produce INSUFFICIENT INFORMATION for installation feasibility.

11. Decision Sequence

Identify customer; verify active agreement and scope; identify requested claim; retrieve technical requirements; identify material site information; resolve production-specific applicability; determine installation readiness; retrieve equipment/operational availability; apply agreement commitment; distinguish scheduling response from completion.

12. Related Documentation

Applicable product specifications, installation guides, compatibility documentation, technical bulletins, inventory records, installation records, and service records. Discount authority, promotions, and ExtendedCare remain governed separately unless explicitly modified.

Northstar Commercial Solutions - Commercial Operations

Customer-specific service and installation commitments define what Northstar has agreed to coordinate or respond to. They do not establish technical site suitability, equipment availability, or guaranteed completion dates unless explicitly documented.
