NORTHSTAR COMMERCIAL SOLUTIONS

DapurKita Restaurant Group Framework Agreement

Agreement ID: AGR-2026-030

Revision: 1

Effective Date: 1 April 2026

Expiration Date: 31 March 2027

Document Type: Customer Commercial Agreement

Authority Class: Customer-Specific Commercial

Customer: DapurKita Restaurant Group

Customer Tier: Preferred

Status: Active

1. Purpose

Establishes a standardized purchasing framework for qualifying DapurKita equipment purchases. It does not establish an automatic customer-specific discount percentage.

2. Scope

Applies to qualifying purchases across Commercial Refrigeration, Commercial Cooking, Warewashing, Ice & Beverage, and Water Treatment, including qualifying multi-location projects.

3. Framework Meaning

The framework does not mean every purchase receives a fixed discount, all products receive the same discount, promotions always stack, every project gets maximum volume discount, or DapurKita has unlimited exception rights.

4. Consolidated Project Purchasing

Multiple locations may be evaluated as one commercial project only when they form one approved project scope, are negotiated as one project, locations and quantities are documented, and purchases are expected under the same approved commercial decision. Unrelated purchases must not be combined artificially.

5. Eligible Equipment Subtotal

CM-001 determines eligible subtotal. Excluded services, ExtendedCare, PROMOTIONAL lines, PRICE_PROTECTED lines, and other ineligible components remain governed by their applicable rules.

6. No Automatic Framework Discount

Discount eligibility depends on qualifying transaction value, product commercial status, current policy, applicable promotions, and explicit approved exceptions. Preferred customer plus framework agreement does not equal a fixed discount.

7. Promotional Products

CM-004 governs PROMOTIONAL products. Unless explicitly permitted, promotional lines do not contribute to standard eligible subtotal, standard volume discount does not apply to them, and promotional pricing does not automatically stack.

8. Payment Terms

Qualifying purchases receive Net 30 subject to applicable order and account conditions. Net 30 does not establish discount eligibility, stacking, approval authority, or broader credit entitlement.

9. Approval Authority

This agreement provides no customer-specific delegated discount authority. CM-002 applies. For a Senior Account Executive, standard authority remains up to 8%, subject to policy eligibility.

10. Policy Maximum vs Authority

Example: eligible subtotal Rp620 juta; CM-001 maximum 9%; Senior Account Executive authority 8%; request 9%. The request may be policy-supported but APPROVAL REQUIRED. The framework agreement does not change this.

11. Above Standard Policy

Example: eligible subtotal Rp620 juta; standard maximum 9%; customer requests 15%. This exceeds standard policy and is a commercial-exception request, not merely a higher-manager approval issue.

12. DapurKita Kitchen Modernization

Total opportunity Rp790 juta; eligible NORMAL equipment Rp620 juta; current discount 7%; requested 15%; owner Senior Account Executive. Framework active, but no automatic framework discount. CM-001 supports up to 9%; PROMOTIONAL lines are separate under CM-004; Senior Account Executive authority is 8%; 15% is outside standard policy and requires commercial-exception review.

13. Future Pipeline and Project Phases

Expected future purchasing volume and unconfirmed future phases do not automatically count toward the current Eligible Equipment Subtotal. Where project scope is unclear, Commercial State is INSUFFICIENT INFORMATION.

14. Expiration

Active through 31 March 2027. No automatic renewal. New transactions after expiration require a current agreement or other authoritative entitlement.

15. Decision Sequence

Identify customer; verify framework; establish project scope; identify lines and commercial status; separate NORMAL, PROMOTIONAL, protected, service, and excluded lines; calculate subtotal; retrieve promotion terms; determine policy eligibility; retrieve sales role; apply authority; identify standard, approval-required, prohibited, or exception treatment.

16. Related Documentation

CM-001, CM-002, CM-004, current product commercial-status records, promotion-specific documents, and current opportunity/transaction records. Technical suitability, compatibility, inventory, installation feasibility, warranty, and delivery timing remain separate.

Northstar Commercial Solutions - Commercial Operations

A framework agreement standardizes the commercial relationship; it does not create unlimited discount entitlement. Each DapurKita transaction remains subject to current product eligibility, commercial policy, promotional restrictions, and applicable approval authority.
