AQUAPURE EQUIPMENT COMPATIBILITY MATRIX

Approved Water-Treatment Relationships for Commercial Equipment

Field	Value	Field	Value
Document ID	CP-001	Revision	4
Effective Date	1 January 2026	Status	Current
Document Type	Compatibility Matrix	Product Family	AquaPure WF Series

1. Purpose and Scope

Defines approved relationships between AquaPure WF treatment systems and supported Northstar equipment, including selected legacy WF systems. Matching connector size, flow, or pressure does not independently establish compatibility.

2. Status Definitions

Status	Meaning
DIRECT	Approved without an additional compatibility component.
CONDITIONAL	Approved only when the stated adapter, condition, or verification is satisfied.
NOT SUPPORTED	Explicitly not approved.
NOT LISTED	No determination established; additional evidence is required.

3. BrewCore BC Series

Equipment	WF-250	WF-300	WF-400	WF-500	WF-600
BC-820	CONDITIONAL - ADP-WF38-12	CONDITIONAL - ADP-WF38-12	DIRECT	DIRECT	DIRECT
BC-920	NOT SUPPORTED	CONDITIONAL - ADP-WF38-12*	DIRECT	DIRECT	DIRECT
BC-980	NOT SUPPORTED	NOT SUPPORTED	DIRECT	DIRECT	DIRECT
BC-1100	NOT SUPPORTED	NOT SUPPORTED	CONDITIONAL - verify peak demand	DIRECT	DIRECT

* BC-920 compatibility must also be checked against applicable production-specific technical requirements where required.

4. Polarix IC Series

Equipment	WF-250	WF-300	WF-400	WF-500	WF-600
IC-280	NOT SUPPORTED	CONDITIONAL - ADP-WF38-12	DIRECT	DIRECT	DIRECT
IC-380	NOT SUPPORTED	CONDITIONAL - ADP-WF38-12	DIRECT	DIRECT	DIRECT
IC-420	NOT SUPPORTED	NOT SUPPORTED	DIRECT	DIRECT	DIRECT
IC-500	NOT SUPPORTED	NOT SUPPORTED	CONDITIONAL - verify peak demand	DIRECT	DIRECT
IC-650	NOT SUPPORTED	NOT SUPPORTED	NOT SUPPORTED	CONDITIONAL - verify demand and pressure	DIRECT

5. WashPro

Equipment	WF-250	WF-300	WF-400	WF-500	WF-600
UW-50	NOT SUPPORTED	NOT SUPPORTED	DIRECT	DIRECT	DIRECT
UW-70	NOT SUPPORTED	NOT SUPPORTED	DIRECT	DIRECT	DIRECT
HT-100	NOT SUPPORTED	NOT SUPPORTED	CONDITIONAL - verify peak demand	DIRECT	DIRECT
HT-140	NOT SUPPORTED	NOT SUPPORTED	NOT SUPPORTED	CONDITIONAL - verify demand and pressure	DIRECT
GW-40	NOT SUPPORTED	CONDITIONAL - ADP-WF38-12	DIRECT	DIRECT	DIRECT
GW-60	NOT SUPPORTED	NOT SUPPORTED	DIRECT	DIRECT	DIRECT

6. Multi-Equipment Installations

Individual DIRECT relationships do not automatically approve a shared multi-equipment configuration. Combined peak demand, downstream pressure, connection arrangement, and site-water conditions must also be evaluated.

7. Adapter ADP-WF38-12

Approved 3/8" to 1/2" AquaPure conversion adapter. It does not increase treatment capacity or service flow, correct insufficient pressure, restore exhausted media, or convert an explicitly unsupported relationship into a supported one.

8. Decision Rules

• Identify exact equipment and WF models.

• Retrieve the explicit relationship.

• Verify all stated conditions, adapters, and technical bulletins.

• Separately evaluate flow, pressure, treatment demand, and site conditions.

• Do not convert CONDITIONAL to DIRECT until verified.

• Do not convert NOT LISTED to NOT SUPPORTED without evidence.

Compatibility applies only to documented relationships and stated conditions. Physical fit or specification similarity is not a substitute for controlled compatibility evidence.
