BREWCORE ACCESSORY COMPATIBILITY MATRIX

Approved Accessory and Component Relationships

Field	Value	Field	Value
Document ID	CP-002	Revision	3
Effective Date	1 January 2026	Status	Current
Document Type	Compatibility Matrix	Product Family	BrewCore BC Series

1. Purpose and Scope

Defines approved relationships between current BC Series machines and selected BrewCore accessories, modules, and service components. Water-treatment and legacy compatibility are controlled separately.

2. Status Definitions

Status	Meaning
DIRECT	Approved without additional compatibility component or modification.
CONDITIONAL	Approved only when the stated condition, kit, firmware, or installation requirement is satisfied.
NOT SUPPORTED	Explicitly not approved.
NOT LISTED	No determination established.

3. Accessories

Part	Accessory	Function
BC-CW2	Cup Warmer Module	Heated cup storage
BC-CW3	High-Capacity Cup Warmer	Extended heated cup storage
BC-DR2	Dual Drawer Module	Under-counter accessory storage
BC-TW1	Tall-Cup Work Surface Kit	Increased cup clearance
BC-AP2	Auto-Purge Module	Automated group purge
BC-TM3	Telemetry Module	Remote operating-data interface
BC-LEG-H	Height Extension Kit	Raises machine working height

4. Main Compatibility Matrix

Accessory	BC-820	BC-920	BC-980	BC-1100
BC-CW2	DIRECT	DIRECT	DIRECT	NOT SUPPORTED
BC-CW3	NOT SUPPORTED	CONDITIONAL - electrical load	DIRECT	DIRECT
BC-DR2	DIRECT	DIRECT	DIRECT	CONDITIONAL - support verification
BC-TW1	DIRECT	DIRECT	NOT SUPPORTED	NOT SUPPORTED
BC-AP2	NOT SUPPORTED	CONDITIONAL - FW 3.4+	DIRECT	DIRECT
BC-TM3	NOT SUPPORTED	CONDITIONAL - FW 3.2+	DIRECT	DIRECT
BC-LEG-H	DIRECT	DIRECT	DIRECT	DIRECT

5. Firmware-Dependent Compatibility

Firmware = embedded software running inside the machine control system.

Where a minimum firmware is specified, identify the exact machine and current firmware. Do not infer firmware from age, installation date, appearance, another machine, or current operating status.

6. Physical Fit vs Approved Compatibility

An accessory may physically attach or connect without being approved. Physical fit does not establish electrical, control-system, firmware, thermal, structural, serviceability, or manufacturer compatibility.

7. Multiple Accessories

Individual accessory compatibility does not automatically establish approval of a combined multi-accessory configuration. Combined electrical load, structural load, control interfaces, space, and service access may require separate evaluation.

8. Decision Rules

• Identify exact machine model and accessory part number.

• Retrieve explicit relationship.

• Verify firmware, electrical, structural, or other conditions.

• Check applicable technical bulletins.

• Separately evaluate site feasibility.

• Keep unresolved conditions explicit.

9. Related Documentation

• PT-003 - BrewCore BC Series Product Catalog

• PT-004 - BrewCore BC Series Installation Guide

• CP-001 - AquaPure Equipment Compatibility Matrix

• CP-004 - BrewCore Legacy Compatibility Guide

• Applicable BrewCore technical bulletins

Compatibility applies only to documented relationships and stated conditions. Physical fit or specification similarity is not a substitute for controlled compatibility evidence.
