POLARIX ICE SYSTEM COMPONENT COMPATIBILITY GUIDE

Approved Modular Ice-System Configurations

Field	Value	Field	Value
Document ID	CP-003	Revision	3
Effective Date	1 January 2026	Status	Current
Document Type	Compatibility Guide	Product Family	Polarix IC Series

1. Purpose and Scope

Defines approved component relationships for modular Polarix IC-420, IC-500, and IC-650 ice-maker heads, storage bins, and approved top kits.

2. Status Definitions

Status	Meaning
DIRECT	Approved for direct installation.
CONDITIONAL	Approved only with the stated top kit or condition.
NOT SUPPORTED	Explicitly not approved.
NOT LISTED	No determination established.

3. Storage Bins

Bin	Nominal Storage	Width	Position
BIN-240	180 kg	560 mm	Compact modular
BIN-360	260 kg	700 mm	Standard modular
BIN-500	360 kg	760 mm	High-capacity modular
BIN-700	500 kg	1,000 mm	Extended-capacity modular

4. Main Compatibility Matrix

Ice Maker	BIN-240	BIN-360	BIN-500	BIN-700
IC-420	DIRECT	CONDITIONAL - TOP-42-70	CONDITIONAL - TOP-42-76	CONDITIONAL - TOP-42-100
IC-500	NOT SUPPORTED	DIRECT	CONDITIONAL - TOP-50-76	CONDITIONAL - TOP-50-100
IC-650	NOT SUPPORTED	NOT SUPPORTED	DIRECT	CONDITIONAL - TOP-65-100

5. Approved Top Kits

Part	Ice Maker	Target Bin	Function
TOP-42-70	IC-420	BIN-360	560-to-700 mm interface
TOP-42-76	IC-420	BIN-500	560-to-760 mm interface
TOP-42-100	IC-420	BIN-700	Extended-bin interface
TOP-50-76	IC-500	BIN-500	700-to-760 mm interface
TOP-50-100	IC-500	BIN-700	Extended-bin interface

Part	Ice Maker	Target Bin	Function
TOP-65-100	IC-650	BIN-700	Extended-bin interface

6. Physical Dimensions vs Compatibility

Available mounting surface is not an approved mounting relationship.

Top kits can provide correct mounting position, structural support, ice-drop alignment, sealing, service access, and controlled component interface.

7. Production vs Storage Capacity

Ice-maker production rate and bin storage capacity are different system characteristics. Storage capacity does not need to equal nominal 24-hour ice production.

8. Existing Bin or Kit Reuse

Identify exact model or part number, condition, required kit, site dimensions, and current compatibility status. Do not identify components from width or appearance alone, and do not substitute field-fabricated adapters.

9. Multiple Compatibility Layers

• Product suitability: can the ice maker meet demand?

• Component compatibility: is the selected bin/kit approved?

• Installation feasibility: can the assembled system fit and meet utilities?

• Water-treatment compatibility: is the treatment system approved?

10. Related Documentation

• PT-001 - Polarix IC Series Product Catalog
