NORTHSTAR COMMERCIAL SOLUTIONS

Commercial Approval Matrix

Document ID: CM-002

Revision: 2

Effective Date: 1 January 2026

Document Type: Approval Matrix

Authority Class: Northstar Commercial

Status: Current

1. Purpose

Defines role-based discount authority, escalation, customer-specific delegated authority, policy exceptions, restricted-product interaction, and treatment of missing or conflicting authority evidence.

2. Standard Authority

Role	Standard Approval Authority
Account Executive	Up to 5%
Senior Account Executive	Up to 8%
Sales Manager	Up to 12%
Regional Sales Manager	Up to 15%
Commercial Director	Above 15% and commercial exceptions, subject to policy

3. Policy First

Approval authority determines who may approve policy-supported treatment. It does not determine whether the treatment is commercially eligible. POLICY FIRST - AUTHORITY SECOND - ROUTING THIRD.

4. Above User Authority

If a policy-supported request exceeds the current user's authority, state APPROVAL REQUIRED and route to the lowest appropriate authority with sufficient authority and policy permission. Do not silently reduce the requested discount.

5. Authority Does Not Override Policy

Example: policy supports up to 9%, Sales Manager authority is 12%, customer requests 11%. The request is outside standard policy; the manager's numerical ceiling does not make 11% standard-policy eligible.

6. Customer-Specific Delegation

An active customer agreement may replace the standard role ceiling only for the exact customer, transaction scope, role, conditions, and active period documented. Specific delegation is not general authority. Expired delegation is not current authority.

7. Promotional and Protected Restrictions

Promotional, price-protected, clearance, and stacking restrictions remain applicable regardless of numerical authority unless an authoritative rule explicitly permits an exception.

8. No Additive Authority

Approval limits are not additive. For example, 5% Account Executive authority plus 12% Sales Manager authority does not create 17%. Approval splitting is not permitted. Opportunity ownership does not itself establish approval authority.

9. Meridian Example

For a qualifying Meridian transaction with eligible subtotal Rp489 juta, active agreement delegation up to 10%, and Daniel as Senior Account Executive, a 10% request may be WITHIN AUTHORITY if all agreement and policy conditions are satisfied. Without that active delegation, standard Senior Account Executive authority is 8%.

10. Prima Historical Example

An expired 2025 Prima agreement with 10% delegation does not apply to a new 2026 transaction. Standard current authority applies unless another current delegation exists.

11. Missing or Conflicting Authority

Missing user role produces INSUFFICIENT INFORMATION; do not infer role from tenure, ownership, or conversation. Material unresolved disagreement between applicable authoritative sources produces CONFLICT.

12. Decision Sequence

Identify sales user and role; establish customer and transaction; determine policy eligibility; retrieve active entitlements; apply applicable delegated authority; evaluate restrictions/exceptions; compare requested treatment to authority; route appropriately.

Northstar Commercial Solutions - Commercial Operations

Approval authority determines who may approve eligible commercial treatment. It does not create eligibility where applicable policy does not support the requested treatment.
