NORTHSTAR COMMERCIAL SOLUTIONS

2026 Equipment Volume Discount Policy

Document ID: CM-001

Revision: 1

Effective Date: 1 January 2026

Expiration Date: 31 December 2026

Document Type: Commercial Policy

Authority Class: Northstar Commercial

Status: Current

1. Purpose

Defines the standard equipment-volume discount framework, qualifying transaction value, eligible and excluded components, restricted product treatment, customer-specific agreement interaction, and commercial review. Individual approval authority is governed by CM-002.

2. Eligible Equipment Subtotal

The Eligible Equipment Subtotal is the combined pre-discount value of transaction lines that qualify under this policy. It is not necessarily the total opportunity, quotation, contract, invoice, or customer spend.

3. Standard Program Bands

Eligible Equipment Subtotal	Maximum Standard Program Support
Below Rp250 juta	Standard commercial pricing
Rp250 juta - Rp499.999.999	Up to 7%
Rp500 juta - Rp749.999.999	Up to 9%
Rp750 juta and above	Up to 10%

4. Eligible and Excluded Components

Eligible components may include active core equipment and qualifying supporting equipment/accessories. Excluded components include installation, ExtendedCare, preventive maintenance, consumables, shipping/freight, taxes, financing, non-equipment service charges, and explicitly excluded products.

5. Product Commercial Status

NORMAL products may contribute when otherwise eligible. PROMOTIONAL products are governed by promotion terms and are not automatically eligible. PRICE_PROTECTED products are excluded unless explicitly overridden. CLEARANCE products are governed by applicable clearance/promotion rules and do not automatically stack with volume discounts.

6. Customer Tier and Agreements

Customer tier does not directly determine a volume discount. An active customer agreement modifies only the specific applicable rule it explicitly addresses. Expired agreements do not establish current entitlement.

7. Policy vs Authority

Program eligibility and approval authority are separate. A higher approval ceiling does not create policy eligibility. A request above the program maximum is outside the standard program and requires the applicable exception process.

8. Mixed Transactions and Stacking

Evaluate transaction lines according to their applicable commercial status. Discount stacking is not assumed. Promotional and other special pricing mechanisms require explicit stacking permission.

9. DapurKita-Style Example

Total opportunity Rp790 juta; eligible equipment Rp620 juta; other components promotional/ineligible or excluded. The standard volume band is based on Rp620 juta, supporting up to 9%, not the Rp790 juta total.

10. Minimum Evidence

Opportunity identity, product lines, quantities, pre-discount values, commercial status, eligible/excluded lines, active entitlements, and requested discount. If eligible subtotal cannot be established, state INSUFFICIENT INFORMATION.

11. Decision Sequence

Identify customer/opportunity; identify lines and quantities; resolve commercial status; separate eligible/excluded value; calculate subtotal; determine band; retrieve active entitlements and restrictions; resolve rules; determine policy eligibility; then evaluate authority under CM-002.

12. Commercial States

WITHIN AUTHORITY; APPROVAL REQUIRED; NOT ELIGIBLE; INSUFFICIENT INFORMATION; CONFLICT.

Northstar Commercial Solutions - Commercial Operations

Discount program eligibility is determined from qualifying transaction value and applicable commercial rules, not from total opportunity value, customer tier, or approval authority alone.
