NORTHSTAR COMMERCIAL SOLUTIONS

Promotional Pricing & Discount Stacking Policy

Document ID: CM-004

Revision: 2

Effective Date: 1 January 2026

Expiration Date: 31 December 2026

Document Type: Commercial Policy

Authority Class: Northstar Commercial

Status: Current

1. Purpose

Defines treatment of promotional pricing and conditions under which promotional benefits may or may not be combined with other discounts.

2. Core Principle

PROMOTIONAL status does not automatically permit additional discounting. Unless an applicable authoritative commercial source explicitly permits stacking, promotional pricing plus additional standard volume discount is NOT ELIGIBLE.

3. PROMOTIONAL Lines

Unless the applicable promotion states otherwise, a promotional line is excluded from the standard Equipment Volume Discount Program, does not contribute to Eligible Equipment Subtotal, and does not receive an additional standard volume discount.

4. Mixed Transactions

The presence of a promotional product does not make the entire opportunity ineligible. Evaluate lines separately; qualifying NORMAL equipment may still participate in CM-001.

5. Approval Authority Does Not Create Stackability

A role may have sufficient numerical approval authority and still be unable to approve stacking prohibited by policy. Eligibility is evaluated before authority.

6. Explicit Stacking Permission

Stacking is permitted only when an applicable authoritative source explicitly establishes it and all documented product, customer, date, transaction, and limit conditions are satisfied.

7. Stacking Limit vs Authority

If a promotion permits up to 3% additional discount and a Senior Account Executive has 8% authority, a requested 5% additional discount remains NOT ELIGIBLE under the promotion.

8. Customer Agreements

A customer-specific agreement may modify promotional treatment only when it explicitly addresses the relevant promotion/stacking claim. General discount entitlement does not automatically apply to promotional lines.

9. PRICE_PROTECTED and CLEARANCE

PRICE_PROTECTED and CLEARANCE products retain their applicable restrictions. Unless explicitly permitted, additional standard discount or volume stacking is NOT ELIGIBLE.

10. DapurKita Example

Opportunity total Rp790 juta; eligible NORMAL equipment Rp620 juta; PROMOTIONAL lines excluded from standard subtotal; current discount 7%; requested 15%. CM-001 supports up to 9% on the eligible subtotal. The 15% request is outside standard policy, and promotional lines do not automatically stack.

11. Exceptions

A prohibited standard treatment may be submitted through an applicable commercial-exception process. Exception review does not guarantee approval and does not change the standard-policy result until an authoritative exception is approved.

12. Missing and Conflicting Evidence

If promotion terms cannot be established, state INSUFFICIENT INFORMATION rather than assuming stacking is allowed or permanently prohibited. Unresolved material disagreement between applicable authoritative promotion sources produces CONFLICT.

13. Decision Sequence

Identify transaction lines and commercial status; retrieve promotion terms; verify dates/applicability; determine subtotal contribution and stacking permission; calculate qualifying NORMAL subtotal; apply CM-001; retrieve customer entitlements; determine policy eligibility; then evaluate authority under CM-002 and route true exceptions.

Northstar Commercial Solutions - Commercial Operations

Promotional pricing and other commercial benefits are not assumed to be stackable. Approval authority determines who may approve eligible treatment; it does not create eligibility where an applicable commercial rule prohibits the proposed combination.
