NORTHSTAR COMMERCIAL SOLUTIONS

Warranty & ExtendedCare Policy

Document ID: CM-003

Revision: 2

Effective Date: 1 January 2026

Document Type: Warranty Policy

Authority Class: Northstar Commercial

Status: Current

1. Purpose

Defines standard equipment warranty interpretation, ExtendedCare eligibility and entitlement, authorized-installation conditions, customer-specific warranty terms, and evidence requirements.

2. Coverage Sources

Coverage may come from standard product warranty, optional ExtendedCare, or an explicit customer-specific warranty entitlement. These must be evaluated separately.

3. Polarix Standard Warranty

For the Polarix IC Series covered by the current Northstar program, standard equipment warranty is 2 years. Standard warranty does not establish ExtendedCare coverage.

4. ExtendedCare Products

EC3Y and EC5Y are separate commercial service products. Their availability in Product Master does not prove customer entitlement or active coverage.

5. Eligibility vs Entitlement

Eligibility asks whether a transaction can qualify. Entitlement asks whether the customer actually has the coverage. Eligible for ExtendedCare does not mean covered by ExtendedCare.

6. Authorized Installation

Where a plan requires authorized installation, the condition must be satisfied through Northstar Service & Installation or another explicitly authorized installer. Planned installation is not the same as completed qualifying installation.

7. Coverage Commencement and Duration

Do not assume coverage starts on quotation, order, invoice, delivery, or installation date without authoritative evidence. Do not arithmetically add standard warranty and ExtendedCare durations unless plan terms explicitly define that relationship. If material terms are missing, state UNKNOWN.

8. Customer Agreements

An active customer agreement may provide specific ExtendedCare treatment, but only within its explicit scope. Expired agreements do not create new current entitlement. Previously activated valid coverage must be evaluated according to its own terms.

9. Meridian Example

IC-420 standard warranty is 2 years. A qualifying active Meridian agreement may support EC3Y with authorized installation. Before required activation conditions are satisfied, coverage is commercially supported/conditional, not active confirmed coverage.

10. Separate Technical and Operational Claims

Warranty does not prove compatibility, site feasibility, product sizing, inventory, or installation scheduling. Authorized-installation eligibility does not prove that installation resources are available on the requested date.

11. Evidence and Missing Information

Confirm active ExtendedCare using appropriate entitlement/order evidence, equipment identity, applicable plan, required installation evidence, status, and dates where material. Conversation statements alone are not authoritative evidence.

12. Coverage States

CONFIRMED; CONDITIONAL; NOT ELIGIBLE; INSUFFICIENT INFORMATION; CONFLICT. These describe warranty reasoning and do not replace discount approval states.

Northstar Commercial Solutions - Commercial Operations

ExtendedCare eligibility, ExtendedCare entitlement, and active coverage are separate claims. Coverage must not be communicated as confirmed until applicable commercial and operational conditions are supported by authoritative evidence.
