BREWCORE BC SERIES

Professional Espresso Systems - Product Catalog

Field	Value	Field	Value
Document ID	PT-003	Revision	2
Effective Date	1 January 2026	Status	Current
Document Type	Product Catalog	Product Family	BrewCore BC Series

1. BC Series Overview

Current professional espresso systems for commercial coffee operations requiring consistent beverage production across sustained service periods. Legacy BrewCore models are outside the scope of this current catalog.

2. Model Selection

Model	Groups	Boiler System	Rated Power	Dimensions	Workload
BC-820	2	Single boiler, 11 L	3.2 kW	760 x 560 x 530 mm	Standard commercial
BC-920	2	Dual boiler	4.8 kW	800 x 600 x 550 mm	High-volume
BC-980	2	Dual boiler	5.6 kW	830 x 610 x 560 mm	High-volume+
BC-1100	3	Multi-boiler	6.8 kW	1,020 x 620 x 570 mm	Premium high-volume

3. Model Positioning

• BC-820: regular daily service and moderate peaks.

• BC-920: high-volume dual-boiler system for simultaneous brewing and steaming demand.

• BC-980: enhanced high-volume system with greater thermal performance.

• BC-1100: three-group multi-boiler system for demanding commercial environments.

4. Water and Utilities

All current BC models require potable water, suitable treatment, drainage, correctly rated electrical supply, and adequate service space. Detailed requirements are defined in PT-004.

5. Compatibility and Legacy Equipment

Water-treatment, accessories, modules, and legacy components must not be assumed compatible from connection size, physical fit, or product family alone. Refer to CP-001, CP-002, and CP-004.

6. Selection Considerations

• Service intensity and peak pattern

• Beverage mix and steam demand

• Staffing and bar workflow

• Site utilities

• Existing equipment proposed for reuse

• Reasonable future growth

7. Limitations

Product positioning is not a guaranteed beverage-throughput figure and does not establish installation feasibility, compatibility, inventory availability, commercial eligibility, or warranty entitlement.

Specifications and requirements are subject to controlled technical revision. Always verify the current applicable documentation before a final customer-facing or installation commitment.
