1. OV Series Overview

Professional commercial ovens for foodservice, bakery, hospitality, catering, and production kitchens. Selection should consider production volume, trays, menu profile, peak pattern, utilities, installation space, ventilation, and growth.

2. Model Selection

Model	Tray Capacity	Temp Range	Rated Power	Supply	Dimensions
OV-420	5 trays	30-260 degrees C	7.2 kW	380-415 V	750 x 780 x 680 mm
OV-520	5 trays	30-260 degrees C	8.5 kW	380-415 V	790 x 820 x 720 mm
OV-660	6 trays	30-260 degrees C	10.5 kW	380-415 V	850 x 850 x 780 mm
OV-720	7 trays	30-260 degrees C	13.5 kW	380-415 V	900 x 880 x 820 mm
OV-800	10 trays	30-260 degrees C	20.5 kW	380-415 V	950 x 900 x 1,050 mm

3. Throughput and Sizing

Tray capacity is not a direct measure of daily throughput. Product type, loading, spacing, recipe, cycle duration, preheating, recovery, loading/unloading, and sequencing all affect output.

4. Site and Utility Considerations

Product dimensions describe the oven body only, not the complete installation footprint. Detailed clearance and site requirements are defined in PT-009.

5. Installation Clearance

Clearance must be determined from current installation documentation. Technical bulletins may modify requirements for a defined equipment population, so model identification alone can be insufficient where applicability depends on production information.

6. Requirement Qualification

• Product/menu type

• Trays per batch

• Normal and peak production

• Production window

• Electrical supply

• Installation space

• Ventilation

• Expected growth

Where fit depends on an unavailable equipment identifier, batch, or site dimension, installation suitability remains unconfirmed.

7. Limitations

This guide does not establish exact cooking time, guaranteed throughput, installation feasibility, minimum clearance, bulletin applicability, inventory, delivery timing, pricing, discounts, warranty, or customer-specific terms.

Specifications and requirements are subject to controlled technical revision. Always verify the current applicable documentation before a final customer-facing or installation commitment.
